DECORATION GUIDE

To enable you to display your branding or corporate messages in a workplace or promotional environment, all Dare 2b products can be either embroidered or printed on.

Perfect for hardwearing products that will be washed frequently. The majority of products can be embroidered but the best results are achieved when using thicker stitching on more durable fabrics such as fleece. Waterproof products can be damaged around the embroidery section, reducing the over-all water resistance.

Ideal for large quantities of product to give a clean crisp finish to the image or logo. Most jackets and softshell products are suitable for screen printing but we don't recommend using this method on fleece or product which can be damaged by high heat.

CUT OUT TAG

All Dare 2b Elite Edit products are now free from all external branding and have a cut out back neck label.

Great for small quantities of of branding with less detailed logos or images. The design is applied with heat pressure which makes it suitable for most jackets and softshell products but not for fleece or products damaged by high heat.

The best option for detailed images or logos giving a direct replication of what is shown on screen on the product. Digital transfers can be applied to most garments but works best on jackets and softshells. We don't recommend digital transfers on fleece or products damaged by high heat.

- We do not recommend embroidering waterproofs as this puntures the fabric and renders it no longer waterproof and invalidates the guarantee
- Heat pressed testing was conducted between 140-170 degress Celsius
- We recommend always using a teflon sheet when heat pressing to protect the garment
 We recommend always using opaque / blockout vinyls to help avoid dye migration.
 For best results use dye block when screen printing
- Always seek expert advice before decorating garment
- Regatta takes no responsibility for the decoration of garments or any resultant damage
- All lined garments have decoration access
